

The H-998Z wheel balancer delivers fast, precise results for every wheel. Its advanced pneumatic quick-lock clamping system secures each wheel swiftly and evenly, saving time and ensuring accurate balancing. A large 19-inch colour display with an intuitive interface, combined with integrated LED lighting and laser guides, simplifies operation and ensures precise weight placement. The H-998Z automatically measures wheel dimensions and detects imbalance points, streamlining the process and ensuring results are accurate to within 1 gram. Built for durability, this robust balancer features a heavy-duty design with a protective wheel cover and integrated weight tray.

### **FEATURES**

- Pneumatic Quick-Locking Spindle
- 19" LCD Display
- Integrated lighting and laser guides
- Automatic location of imbalance points
- Electronic internal gauge with external sonar to measure wheel dimensions

### **TECHNICAL INFORMATION**

- Voltage 220V
- Power 0.25kw
- Balance period 7S
- Balance accuracy  $\pm 1g$
- G.W./N. W. 235kg/204kg
- Rim centre hole diameter  
Less than 135mm
- Rim range 10-30"
- Tyre width 1.2-20"
- Tyre diameter 1050mm
